# ONTARIO POPULATION STATISTICS -1969

## DEPARTMENT OF MUNICIPAL AFFAIRS

MINISTER **W. DARCY MCKEOUGH**

DEPUTY MINISTER **W. H. PALMER**

*Ontario*

## COMMUNITY PLANNING BRANCH

DIRECTOR **D. F. TAYLOR**

PRICE \$2.00

## INTRODUCTION

---

This publication is designed to provide, in a single volume, population data for Ontario municipalities for the period 1941 to 1969. Municipalities examining their own communities and planning for their future development should find it useful as a source of basic data on trends and change.

The major source of data is the Census of Canada for the census years 1941 to 1966. More recent data, for the years 1965 to 1969, is available from assessment records. It should be noted that the figures from DBS and DMA are not strictly comparable. The reasons for this appear in the reference notes.

Population figures are used in planning not only to indicate current size and trends but also to calculate change and to compare changes in different municipalities. To assist in this, tables are included showing numerical change and rates of change during various time periods from 1951 to 1966.

Changes within the municipality are evident from the numerical population data. Comparisons between municipalities for a specific time period (or between different time periods for a specific municipality) can be made from the annual rates of change. There are many factors that reflect the importance of a municipality in relation to its surrounding

area. Population is one of them. Accordingly, one of the table series shows the population of each municipality as a percentage of the population of the regional municipality, county or district in which it is located.

From time to time, annexations and amalgamations change the boundaries of municipalities, which are the geographic areas used for recording the population statistics. Where such changes have occurred, symbols are used in the tables to indicate the nature of the change. The reference notes on the following page should be used as a guide in interpreting the tables.

Population data for a specific municipality can be located by referring to the regional municipality, county, or district in which the municipality is located. The municipalities are grouped by status under cities, towns, villages, and townships, and arranged alphabetically.

---

This document was prepared in the Research Section, Research and Special Studies, Community Planning Branch, Department of Municipal Affairs. The co-operation of the Systems and Programming Branch, Computer Services Centre, Department of Treasury and Economics is gratefully acknowledged.

## REFERENCE NOTES

---

The Census of Canada population figures and Department of Municipal Affairs assessed population figures are not strictly comparable. At the two points of comparison, 1961 and 1966, DBS figures are higher than those for DMA, as they reflect total population as against DMA assessed population. For a specific municipality, DMA excludes persons in institutions, and defense establishments. The DMA totals also exclude the population of Indian Reserves and Unorganized Areas.

When there is a change in the status of a municipality or in a municipal boundary, the nature of the change is indicated by one of the following letter symbols, located after the population figure:

- A Amalgamation
- B Annexation to
- C Annexation from
- D New municipality or change in status
- E Dissolution
- F Renaming
- G Other or a combination of several changes
- H Prior to incorporation or reduction
- J New Regional Municipality

The symbol J, indicating a new regional municipality, involves some combination of amalgamation, annexation, renaming or dissolution of other municipalities. Population figures are estimates. Other population estimates are indicated by

an asterisk, e.g. 432\*. These occur where the population figure is not available or an interpolation is necessary.

In some cases, there may appear to be a discrepancy between DBS and DMA indications of change in municipal status or boundary change. This is because DMA information is based on the Municipal Directory, which lists the status of each municipality for the year in which the Directory is published but gives population statistics for the previous year.

For example, Metropolitan Toronto was reorganized, effective January 1, 1967. The 1967 Municipal Directory lists the reorganized municipalities, so 1966 DMA population is shown in terms of cities and boroughs. This obviously differs from DBS which gives the population of the counties, towns, villages and townships as they existed when the Census was taken in 1966.

Where municipal boundaries change soon after a census year, the DMA figures will reflect the new boundaries for several years before DBS population figures show the change. For example, the Counties of Lincoln and Welland were dissolved to form the Regional Municipality of Niagara, effective January 1, 1970. The 1970 Municipal Directory lists each reorganized municipality with a 1969 population figure which represents the population of the newly created municipality. The symbol H or J after the population figure indicates that the area in question was not a legal corporation that year. The new municipality will appear in DBS figures for the next census year, 1971.
